Questions? Call: 800/852-0942, ext. 4451 or 4453 or 4547

I. General Information

1. Date _____
2. Landowner name _____
3. Address _____
4. Telephone number and e-mail address _____
5. How did you find out about the Stream and Wetland Restoration Program?

6. Do you have neighbors that would be interested in the program? _____

II. Site Characteristics

1. County _____
2. Stream name (if known) _____
3. Stream size (width and length) _____
4. Do you own both sides of the stream? Yes___ No___ Combination___
5. Do the stream banks have trees growing on or within 25 feet of them? _____
6. Brief description of the problem with the stream.

To ensure long-term benefits and protection of the project area, the landowner must agree to a perpetual conservation easement or deed restriction. Generally, the easement would pertain only to the affected stream channel and newly created streamside zone with planted trees. Ownership of the land protected by a conservation easement is retained by the landowner. No public access is implied by entering into a conservation easement unless otherwise stated within the easement.

KDFWR will evaluate the information provided on this form and determine if the property meets the SWRP site criteria. Properties that meet SWRP criteria are potential project sites that will require a field assessment before a funding determination can be made. By completing, signing and returning this form, I give KDFWR permission to perform a site feasibility assessment of the property described above at no cost to the landowner and at a date and time to be agreed upon by KDFWR and the landowner.
